What you may not know is that Dampé also has a tutorial element that doubled as an additional set of dungeons. Here's how we find him. In fact, there are no real protests towards Dampe: once you get there you can handle the dungeon creation tool. You can find it at the site above, north of the cemetery area. To get it, you will need a power bracelet (from the second dungeons) to lift the rocks that block the paths to the south and west. Just go inside and introduce yourself, and it will give you access to the tutorial dungeons tool, as well as the opportunity to make your own dungeons. Money from oral transfer over, and you can save individual dungeons to amiibo figures if you want (awakening amiibo link 2019 will add an enemy shadow link to your creation, and any Link amiibo can save your own dungeon). That's it! Think of it as an additional addition of species beyond existing Color Dungeon.You're out. Login | Sign up Click to open Photo Gallery: Chris has enjoyed Destructoid lit since 2008.
